## Open Frame Removable Bowl Spiral Mixer

The NEW revolutionary Topos Open Frame Removable Bowl Spiral Dough Mixers (OFRBSDM) are heavy duty and built for heavy production needs while being super sanitary in design. The engineering goal was for a completely sanitary washdown design in a heavy duty removable bowl spiral mixer. The entire mixer is constructed of solid Stainless Steel and sanitary materials.

The OFRBSDM mixer is built for very easy cleaning and maximum reliability while remaining "OSHA" safe. The Allen Bradley fully programmable controls allow the operator to program recipes and to customize the completely variable mixing speeds and the mixing time for every dough type. The mixer has a standard, rugged, stainless steel bowl cover equipped with connections for bulk liquid, bulk dry and manual ingredient inputs. These OFRBSDM mixers are ideal for mixing all types of dough, both firm and soft. We offer the mixers in 240kg/529lbs and 300kg/661lbs dough mixing capacities. These mixers include many rugged and sanitary features as shown on the back page.

\*Dough mixing capacities based on 60% dough absorption

# Standard Features

The quiet, heavy duty direct drive gearmotor delivers the variable speed power via its oversized VFD Drive.

Heavy duty stainless steel bowl cover with liquid and dry ingredient inlets and integral perimeter safety edge.

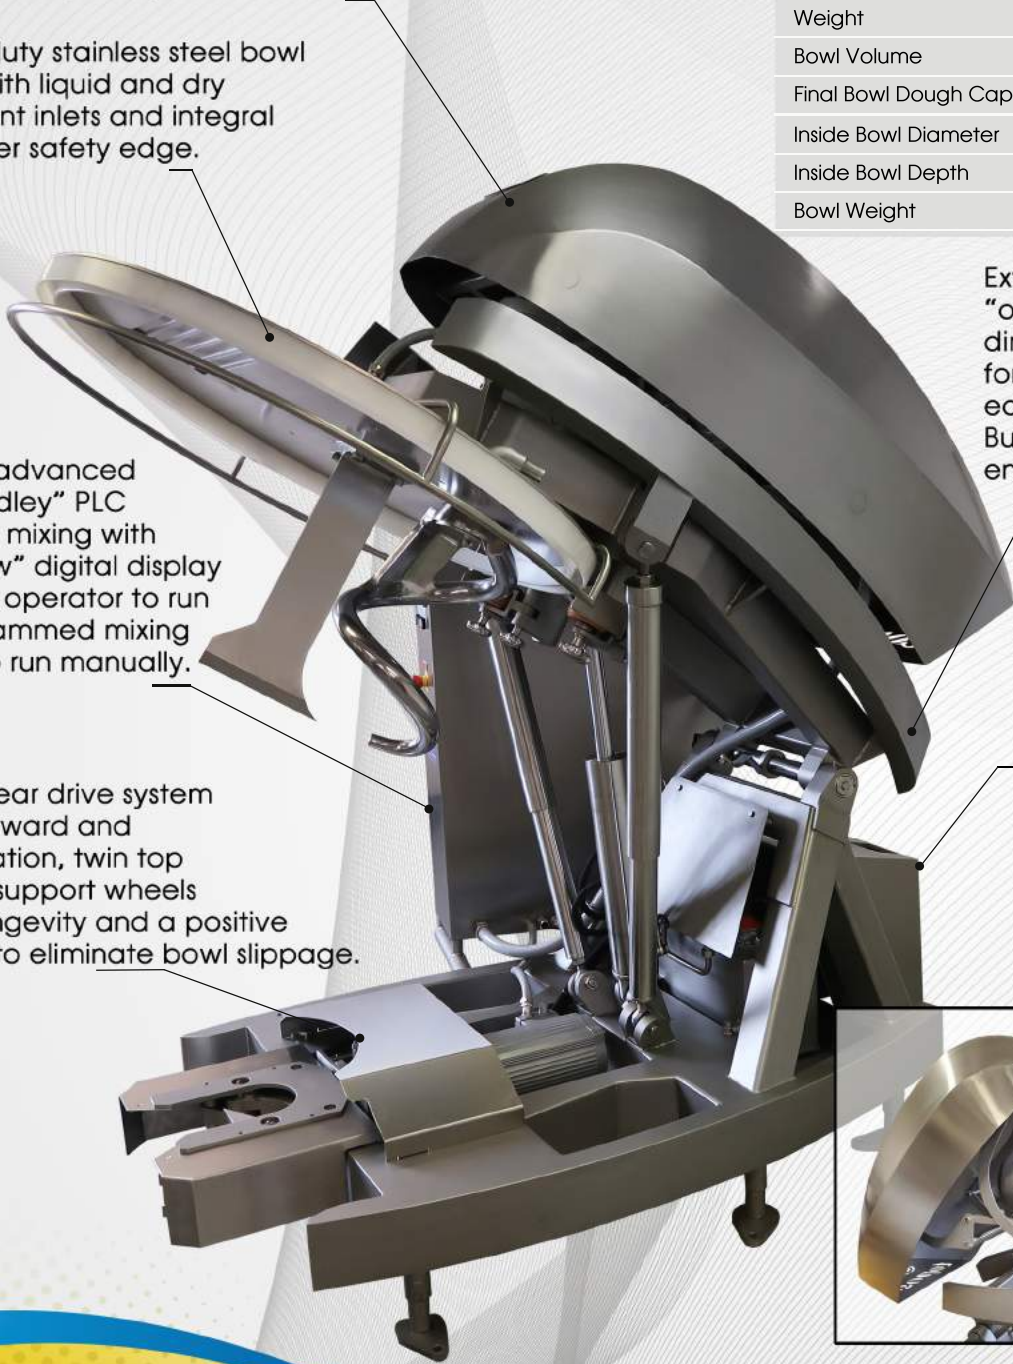

Standard advanced "Allen-Bradley" PLC controlled mixing with "Panelview" digital display allows the operator to run pre-programmed mixing times or to run manually.

The bowl gear drive system features forward and reverse rotation, twin top roller bowl support wheels for bowl longevity and a positive gear drive to eliminate bowl slippage.

Model	T-300 OT
RPM of spiral agitator	70-208
Motor HP	26 hp/20 KW
Service Power Size (at 480 volts)	60 amps
Weight	4356 lbs/1980 kg
Bowl Volume	15.5 cu/ft 440 l
Final Bowl Dough Capacity	660 lbs/ 300 kg <small>depending on product density</small>
Inside Bowl Diameter	43.5"/1090 mm
Inside Bowl Depth	19.5"/495 mm
Bowl Weight	683 lbs/310 kg

Extra heavy duty, all S/S "open" frame and direct drive construction for extra-long life and ease of sanitation. Built for "wash down" environments.

Lift off S/S cover allows quick and easy access to the hydraulic pack.
