Single Sigma Open Frame Mixer

Topos Mondial offers a Single Sigma, "Open Frame," Sanitary Designed, 110 degree overtilt horizontal mixer (SSOFHM). These mixers are being manufactured in several sizes from 600 lbs through to 3400 lbs. The bowl resembles a single sigma agitator design. The reinforced mixing bowl, bowl canopy, main shaft, and single sigma agitator are all solid stainless steel. The mixer frames can also be made using mild steel coated in 'STEEL-IT' or from all stainless steel.

The mixing controls can be custom built to meet your exact mixing needs. Variable speed VFD controls with a dynamic brake are standard for mixing versatility. The heavy duty "Hytos" hydraulic bowl tilting package is easily accessible under the stainless steel lift-off cover. Easy maintenance, heavy duty construction and super sanitary design are its trademarks.
