Dry Material Dispenser

The Topos dry material dispenser is intended to suit an assortment of applications with varying types of dry, flowable toppings/materials. Topos dispensers are built to last, using a robust design and are meticulously engineered for ease of use, sanitation and safety. The material hopper is removable so changing products can be quickly and easily accomplished, and the hopper can be sanitized thoroughly, while "off" of the line. These units can be equipped to suit your exact electrical needs and equipped with a standalone, NEMA 4 wash down AC drive or a custom-built push-button control panel. The variable speed drive controls the speed of the rotary agitator in the hopper, which varies the material dispensing rate. The adjustable slide tabs under the perforated hopper screen varies BOTH the dispensing width and the dispensing rate. Topos offers a 24", 36", and 48" wide unit to accommodate your product width. We also offer an upgraded 100% stainless steel gearmotor drive version for full washdown and longevity.

Standard Features

For Harsh Wash-down environments, optional 100% stainless-steel motor-gearbox steel and stainless-steel bearing housings are available.

The lift off hopper lid protects product in the hopper from contamination and stops access to agitators during production.

Machine comes in three sizes to fit your line, 24", 36" and 48" width.

Option of a Stand Alone variable speed controller or a custom built control package, in the voltage so suit.

Flow adjustment tabs allow adjustment of flow and can be used to make patterns, or vary the dispensing width.

In addition to mounting over your line, Topos dispensers can also be mounted on a portable [mobile] stainless steel cantilevered frame with robust casters so it can be easily moved from line to line as needed.

Topos dispensers are built to last using a robust sanitary design and are meticulously engineered for ease of use, cleaning and safety.

The material hopper releases from frame to allow easy product switch over without the use of tools.

Ideally suiting for dispensing all types of Flours, Cinnamon Sugar, Starch, Cornmeal, Granular Sugar, Sprinkles, and similar free flowing dry materials.
