

TEMPLATE TOPPER SEEDER

Applies sesame/poppy seeds in square, round or oval patterns to product traveling in pans on a conveyor. Available as con-

veyor mount, cantilevered or conveyORIZED units. Best at speeds up to 60 feet per minute.

FEDCO TEMPLATE TOPPER SEEDER

New and improved with optional "Spot Water" sprays. The same accuracy that is an integral part of the template topper has now been added to spray the product only, not the entire pan surface with water. Increases life of pan glaze. Optional bun splitter accessory is also now available. You can seed all your products within one pan simultane-

ously, and in just a fraction of a second. Have your toppings uniformly applied where they belong, on your product; not on your pans. Perfect for applying sesame seed, poppyseed, sugar, or any dry material having uniform particle size. Can be applied to bread, buns, cookies, rolls, pastry. Available in conveyor models as well as cantilevered units.
